Eric Babu

Senior Business Analyst / Product Owner | Digital Products, Process Improvement and Agile Delivery | UK Energy Retail

Leicester, UK | +44 7776 623120 | ericbabu20@gmail.com | linkedin.com/in/ericbabu | github.com/ericbabu20

Professional Profile

Business analyst and product owner with over two years delivering customer-facing digital products in regulated UK energy retail. I own the customer portal, mobile app and sign-up journey at Outfox Energy, from discovery and requirements through UAT, launch and post-release measurement. Results include a 30% cut in registration-team workload through automated supply-point validation, 15 to 20% fewer tariff-renewal contacts each month and 20% fewer Direct Debit contacts. I combine process analysis and stakeholder management with hands-on API, SQL and analytics skills, and build AI-powered products independently.

Key Skills

Business analysis: Requirements elicitation, process mapping (BPMN 2.0), business rules, process controls, exception handling, root-cause analysis, gap analysis, business case development, process improvement.

Product ownership: Product discovery, roadmapping, backlog management, RICE and value-versus-effort prioritisation, PRDs, functional specifications, user stories, acceptance criteria, release planning.

Delivery and change: Agile, Scrum, Kanban, Jira, sprint planning, UAT, defect triage, go-live readiness, release notes, support handovers, incident investigation, post-release verification.

Stakeholder management: Engineering, QA, design, operations, customer service and third-party suppliers; clear written and verbal communication at all levels.

Data, systems and analytics: SQL, API testing (Postman), system integration, Google Analytics, funnel analysis, A/B testing, Figma, user journey mapping.

AI and emerging technology: Retrieval-augmented generation (RAG), AI assistant workflows, prompt engineering, AI-assisted prototyping (Cursor, Lovable).

UK energy domain: Tariffs, billing, settlements, payments, Direct Debit, smart and prepayment meters, meter validation, Priority Services Register (PSR), Warm Home Discount (WHD), Ofgem-regulated customer communications.

Professional Experience

Product Analyst / Product Owner, Outfox Energy (Redfish / Zog Solutions)

Leicester, UK | April 2024 to present

Product owner for the customer portal, mobile app, sign-up journey and website of a UK domestic energy supplier, working with engineering, design, QA and operations.

Sign-up journey

- Introduced automated supply-point validation using the industry EES API, rejecting commercial customers, de-energised meters and unmetered properties at source and **cutting registration-team workload by 30%**.
- Delivered mobile and email validation at sign-up, **improving contact data quality by 18%** so customers can be reached for debt recovery after they leave.
- Currently leading usage-based quoting, replacing low, medium and high estimates with actual consumption; **expected to raise Direct Debit accuracy to 65%**.

Customer portal

- Delivered self-service tariff renewals, **reducing renewal contacts by 15 to 20% every month**.
- Delivered digital Direct Debit set-up, including a journey moving pay-on-bill customers to Direct Debit, **reducing related contacts by 20%**.
- Designed the meter-reading page end to end, from UX to submission logic, reducing contacts during price cap changes.
- Replaced manual, call-based change of tenancy and Priority Services Register (PSR) processes with digital forms.
- Led a complete UI and UX redesign of the portal; now working on half-hourly consumption data.

Website

- Coordinated the Zendesk FAQ, chatbot and contact page integration for contact centre operations.
- Integrated the Prismic CMS for terms and conditions, removing the need for a code deployment to make each update.
- Implemented Google Analytics and an A/B testing framework to track visits and page-level behaviour.

Analysis and delivery

- Own the product backlog and write PRDs, functional and technical requirements, user stories and acceptance criteria for front-end and back-end teams, prioritising with RICE and value-versus-effort analysis.
- Elicit requirements from operational and technical stakeholders and map billing and settlements workflows in BPMN.
- Define business rules, process controls and exception handling for tariff eligibility, meter data, Direct Debit and billing workflows.
- Plan UAT, test APIs in Postman and validate data with SQL across sandbox and production; coordinate go-live, release notes and support handovers.
- Investigate live production issues escalated by customer service and drive resolution with engineering and QA; run Agile ceremonies in Jira.

Earlier Experience

Business Manager, Sales, Livspace Home Interiors

Hyderabad, India | June 2023 to April 2024

- Owned the P&L and client lifecycle for high-end residential interior projects from enquiry to handover, coordinating design, delivery and operations stakeholders.
- Recruited and mentored designers and architects, and introduced structured engagement processes that improved conversion and delivery efficiency.

Team Lead / Business Development Associate, BYJU'S (Think and Learn Pvt Ltd)

Bangalore, India | November 2021 to April 2023

- Led, trained and performance-managed an inside-sales team that consistently exceeded targets through disciplined follow-up and customer engagement.

Project Coordinator, Rainbow Constructions

Kerala, India | October 2020 to October 2021

- Coordinated civil engineering projects with design and structural engineering teams.

Independent AI Projects

Aura Spaces AI Energy Assistant (deployed). Smart-home energy assistant that turns real Octopus Energy consumption data into plain-English guidance. Covered product definition, UX, coding and deployment.

Compliance Analyst AI (in development). AI-assisted compliance review prototype for energy regulatory documents, built on local-first retrieval-augmented generation with cited retrieval, gap identification and auditability.

Education and Certifications

Fellowship, AI Product Management, Airtribe, Cohort 33 (2026)

Bachelor of Technology, Civil Engineering, Mar Baselios College of Engineering and Technology, KTU University, India (2016 to 2020)

Certifications: Business Analysis Fundamentals (ECBA-endorsed course); The Practical BPMN 2.0 Master Class; Advanced Product Management: Vision, Strategy and Metrics; AI-First Product Management, Airtribe (2025); UI/UX Prototype Essential Training.
